

PRIVATE CLIENT SERVICES – INVESTMENT MIGRATION

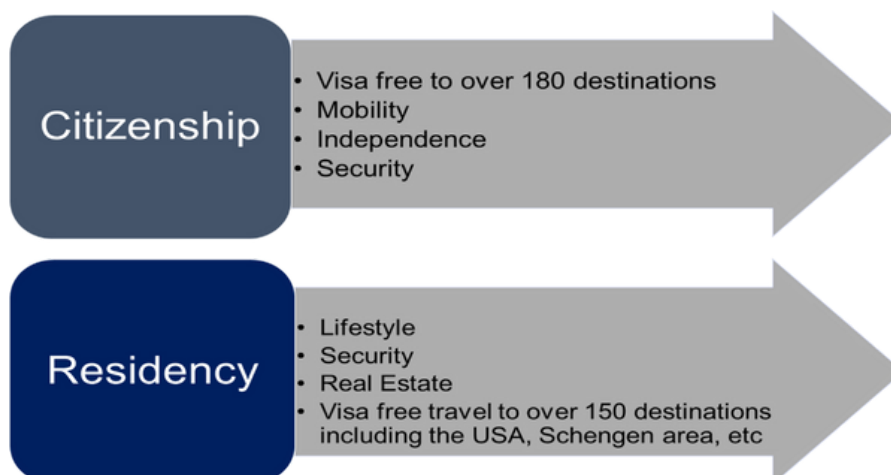

JUNE 2020

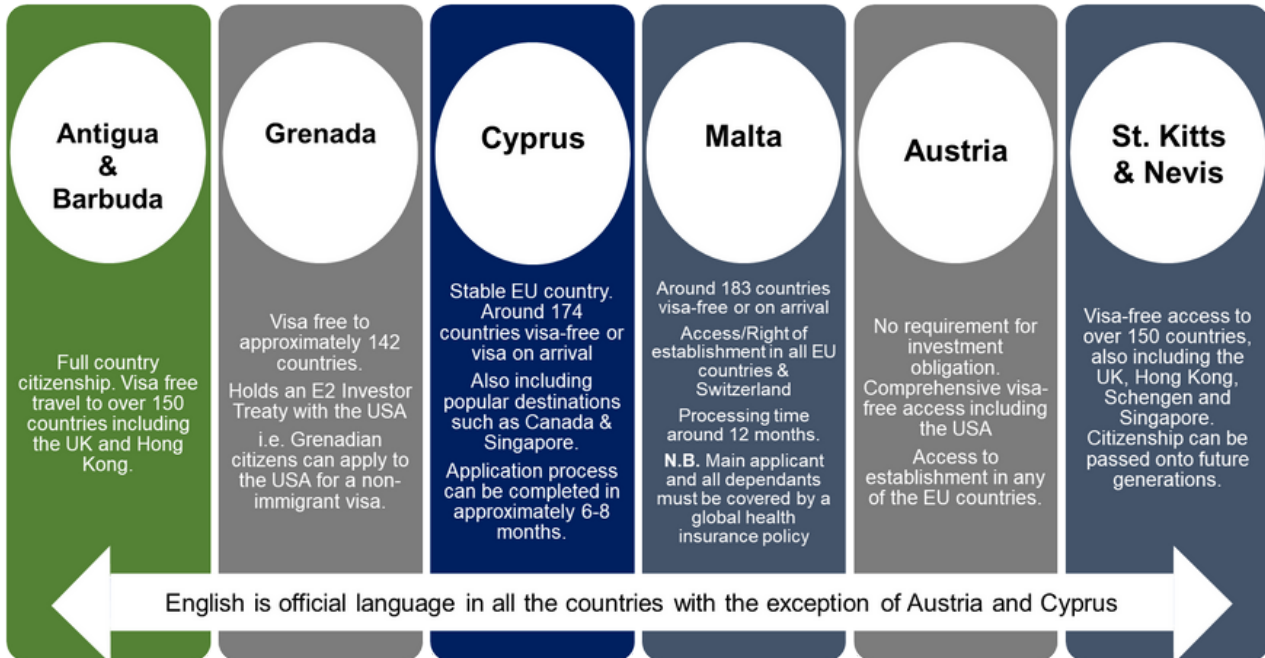

INTRODUCTION

Investment Migration has become a theme of increasing interest among globally mobile businesspersons and investors because of the expansion of globalisation. The growing trend is for wealthy individuals and families to invest substantially in countries other than their countries of origin to acquire citizenship of the countries they invest in. Many countries now offer direct citizenship or residency (with the right to citizenship after a certain period ranging from 1 to 10 years) through investment in the countries. Amongst the numerous reasons that make the Investment Migration popular is the fact that it is the fastest way to become a 'global citizen' and it gives a successful investor and his/her family access to good quality of life, especially investors from developing countries like Nigeria.

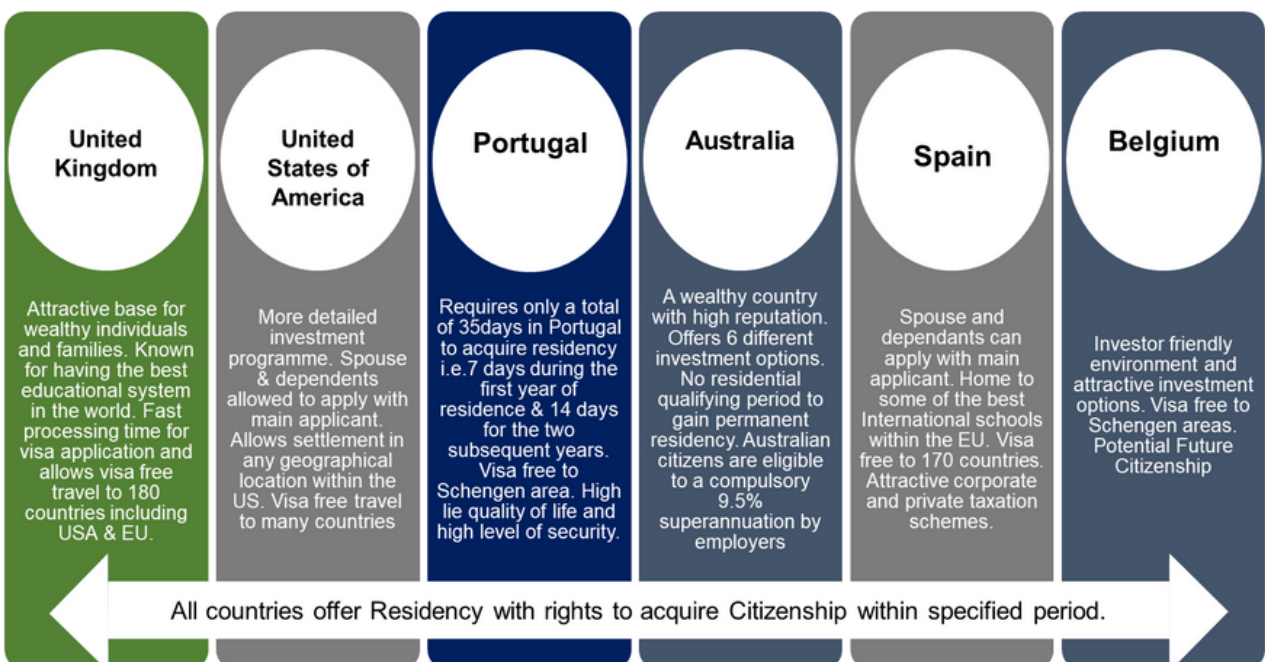

REASONS TO ACQUIRE SECOND CITIZENSHIP

KEY ADVANTAGES OF COUNTRIES THAT OFFER CITIZENSHIP BY INVESTMENT

KEY ADVANTAGES OF COUNTRIES THAT OFFER RESIDENCY BY INVESTMENT

GENERAL QUALIFICATION

- An applicant must be a person above 18 years who can make a qualifying investment.
- Dependants of a person who makes a qualifying investment.
- Dependants include:
 - spouse of the principal applicant
 - child under 18 years or between 18 – 25 (in full time study)
 - parents or grandparents of both the applicant and spouse over 65 years, living and fully supported by the main applicant.

JEE is well positioned, with the support of our foreign partner, to provide structured advice to interested candidates. Brief facts have been provided for information purposes. Detailed information about each investment destination will be provided as requested.
